DIBELS Error Pattern Study

Initial Sound Fluency (ISF)

- How accurate is the student with initial sounds?

- How fluent is the student with initial sounds?

- Is the student more able to identify initial sounds when he can point to the answers rather than supply the sound? (Recall of sounds is more difficult than recognizing them in spoken words.)

- Look for any other unusual error patterns. (i.e. pointing to the pictures in the order that the practice was given)

Add any other notes on the back of this form.
